Backlinks:

Added 13 new backlinks.

Notes from your account manager:

This week we published 1 blog.

Why does blogging improve search engine optimisation?

Google and other search engines use ranking factors to figure out what results come up for each search query. It also decides how to rank those results. Blogging can help you optimise your site for important Google ranking factors like:

- Organic Click-Through Rate
- Index Coverage
- Internal Links

These are just a few of the many reasons that blogging is good for SEO. Blogging lets you share useful information with your audience. It can draw new customers and engage current customers. Creating a blog can help you build trust, boost sales and leads, and improve your search engine optimisation.

After that we worked on your backlinking profile we added 13 new backlinks.

What Are Backlinks?

A backlink is a link that one website gets from another. In addition to driving brand awareness and referral traffic, backlinks can benefit your SEO performance. Many sites accrue backlinks naturally, but marketers often work to generate and maintain them.

Why Backlinks Are Important for SEO

Backlinks are important for SEO because Google views some backlinks like recommendations. Generally, the more backlinks a page or site has, the more trustworthy it's perceived to be.
